

Dear Sirs,
I ask to oppose HR 4026

I object very strongly to any proposed legislation that the National Association of Broadcasters are lobbying for to restrict satelllite radio broadcasting. They are loobying to protect their own interests, not radio listeners' interests. I subscribe \$10 per month to enjoy satellite broadcasting as the quality and quantity is so good.

Please, please, please refrain from responding sympathetically to any pressure from the National Association of Broadcasters to restrict the freedom of people like me to enjoy which broadcats I wish. Instead, encourage the NAB to improve their own programming to the point where I would no longer feel compelled to pay for satellite radio programs.

With respect and thanks,

Brian Jones.
